

product specification

Help protect staff and property by granting access to authorised callers only:

Audio entry systems provide a convenient, cost effective security solution, eliminating unwanted access to building entrances and improving personal safety. By means of an external call-button station and an internal handset, visitors are required to 'buzz' in, allowing reception personnel to maintain control over who is allowed entry.

The benefits that audio entry systems offer can be applied in a variety of situations. Offices, banks, schools, residential properties, shared commercial properties and hospitals all use some form of secure entry system. In fact anywhere access to building entrances needs to be controlled, could benefit from an audio entry system.

In addition, our audio entry solutions can be integrated with the Auto:time Access or Auto:time premium software packages. Auto:time Access provides additional functionality, in that every visitor and employee can be provided with their own swipe or proximity card, allowing them to gain entry (within pre-determined time zones) without the need to 'buzz' in. Furthermore, Auto:time premium adds time & attendance functionality to the system, ensuring employee hours worked, overtime, lateness & absenteeism are all recorded accurately before exporting to payroll.

Audio entry kit:

Manufactured from the highest grade stainless steel, provides physical resistance to abuse with enhanced aesthetics and are available flush or surface mounted.

Each kit includes;

- Audio entry unit (flush or surface mount)
- Audio handset
- Power supply

Additional hardware options:

- Direct pull magnetic locks & brackets (see datasheet 01-600-8110)
- Electric keep/strike (see datasheet 01-600-8110)
- Auto:time access controller (for use with Auto:time Access/Premium Software)
- Indala external mag-stripe reader (for use with Auto:time access controller)
- Indala external flexpass reader (for use with Auto:time access controller)
- HID iClass external proximity reader (for use with Auto:time access controller)

Additional software options:

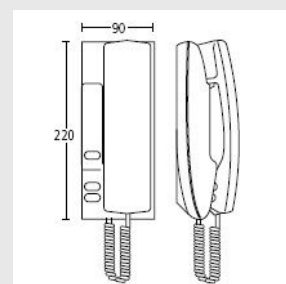

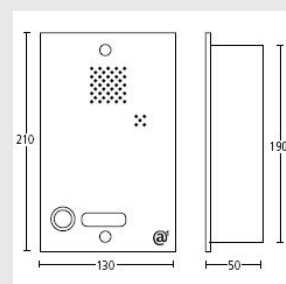

- Auto:time Access software (see datasheet 01-600-5003)
- Auto:time Premium software (see datasheet 01-600-6105)

auto:time audio entry unit

Part No:
01-600-8101
(flush mount)

Part No:
01-600-8102
(surface mount)
